How far this want of success is due to his

deserved his punishment, for he had driven treatment. The crime was committed in the little village of Knangyingmung, just outside the gates of Nanking. A small official there named Chu had in his employ a young man named Chang. Like most of his follows, young Chang would keep a good part of the money that passed through his hands, and one day, not long since, after keeping back more than the usual amount, he was dismissed from service. A short time afterwards he returned to the yamen and, on being espied by Mr. Chu. was severely reprimended and charged with stealing. As Mr. Cha's temper got the better of him he called a relative, a soldier, and commanded him to seize the intruder and give him two hundred blows. This the soldier, who was also named Chu, was delighted to do as he had an old gradge against Chang. But not satisofficial had gone, and heating a poker red hot. as soon as he heard of the affair brought it to the notice of the proper authorities, with the result that the official was sent into exile, and his younger relative beheaded. A Chinese friend came in breathless a few days since with a very marvellous ghost story. his wife's brother, a young scapegrace, had just been buried. His death had been caused by dissipation. His sister, our friend's wife, was very much affected by the sad occurrence and on the day of the funeral rushed wildly to the grave seized a brick and hurried back to the house. Her husband had followed her in astonishment and on his return was still more perplexed when the whost of his brother-in-law began to address him through his wife's mouth To prove his identity the ghost recited an original poem and mentioned things which his sister sould not have known. Healso picked upa pipe and smoked, a thing which the woman had never done He apologised for borrowing his sister's topgue, saying that he had very comfortable quarters is the lower world and left messages for his friends, the chief of which was that his widow should not for me to keep my promise, and endeavour to marry again. The remarkable thing about the manifestation, however, was the request of the ghost that an account of his visit should be sent

HONGKONG AND YOKOHAMA,
THE object of the Company is to form and
Manufacture of Watches of all kinds and de-
For this purpose it is proposed to purchase a site within the limits of the Foreign Settlement
of Yokohama and thereon to erect the Factory.  The founders of the Company are nessessed
of a plant of machinery complete in every particular of the newest design and the finest
workmanship, and adapted for the making of all implements used in the watch trade, as well as
the making of watches. It is well known that machinery has effected a complete revolution in the watch trade, and it is confidently expected.
- ver nincu Gaur, alleric ix confidently have 4.3 ).

sign and the finest r the making of all ch trade, as well as is well known that plete revolution in the watch trade, and it is confidently expected that by availing itself of the comparatively cheap labour of this country this Company will be able to supply the trade in all parts of the world with an article which for excellence of workmanship and cheapness of price will defy O. I, ALBANY (Six Rooms).

Mr. P. H. Wheeler, the Superintendent of the Company, has been for many years engaged in developing watch making machinery, and the testimonials from his former employers testify to his business ability, skill, and integrity. The machinery of which the founders are possessed has been perfected under his superintendence, and a considerable part thereof is of his invention.

Besides the machinery the founders are possessed of ten thousand watches in various stages of completion which are the out-turn of the said machinery, and material on hand sufficient to turn out about twenty-five thousand more. It will thus be seen that it is not an untried plant which the founders have acquired, but one which has already given proof of its excellence. It was only the advantage of obtaining a cheaper labour market than can be found in the United States that has induced them to work the business in

It is an established fact that the principal factories in the United States in seven years paid 300 per cent. dividend on a capital of Six FINE FIVE-ROOMED HOUSE, No. 5, Million Dollars; and that was done on a wage basis of \$1.50 (gold) per operative, the factories employing six thousand hands. If the difference in the rate of labour in this country is taken into consideration the operations of the Company will be assured to realize to the full the expectations of the founders. The profits of watch making are based entirely on the price of labour.

It is not in the labour market only that an advantage will be obtained. Coal and other materials can be purchased in this country at a lower rate than in the United States. And , besides all these advantages, which are great, there is one of still greater importance, the with Board. knowledge to be obtained of the requirements of the local trade, of the trade for China, and that of "The Straits" and India. The Company will be capable of supplying a watch of the best workmanship to the population of these large and important countries at a price far below any watch of like character that has ever been offered to these markets.

Taking into consideration these advantages the founders confidently expect to pay a dividend of at least 10 per cent. per annum on the first two years' work and thereafter dividends at a much higher rate.

The Company has been registered in Hongkong as a Limited Company,

The founders take and acquire 30,000 shares of the stock of the Company in payment for the machinery, plant, and stock and their labour and | cury, experience in preparing and procuring the machinery and stock,

Ten thousand shares of twenty-five yen each · are offered for subscription.

The memorandum and articles of association of the Company may be inspected at the offices. of the Company, No. 10, Bund, Yokobama.

Applications for shares should be made forms annexed to the Prospectus, and should be forwarded to the Hongkong and Shanghai Bank. ing Corporation, accompanied by a remittance for the amount of the deposit.

Form of Application for Shares will be sent! free to any person by addressing the HEAD OPPICE; IC. BUND. YOKOHAMA.

Daily Press Office, Hongkong. this Werk stands unrivalled. All the new and in science generally, which the rapid advance for students of a most instructive nature. Both the accents being carefully marked on the best displays the success of an attempt to make the of body, thereby effecting a vast economy of attained, and dispensing with those vast margins terized Chinese publications.

To illustrate the vast scope of the work the Wm. J Rotch, Amr. sh., 1,564, Lancister, Nov. Chalmers Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applipations and equivalents of different words which this work contains more than five times as many as any other D tionary hitherto pub-

For practical purposes the arrangement of te work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in China it caunot but be invaluable occasion-

"Dear Sir.—I am a poor hand at expressing my feelings, but I should like to thank you. Your lo-Lenges have done wonders in relieving my terrible Lenges have done wonders in relieving my terrible cough. Since I had the operation of Tracheotomy (the same as the late Emperor of Germany, and nalike him, thank God, I am still alive) performed at St. Bartholomew's Hospital, no one could possibly have had a more violent cough; it was so bad at times that it quite exhausted me. The mucus, which was very copious and hard, has been softened, and I have been able to got rid of it without difficulty.—I am, sir, yours train I Will. yours traly, J. Hill."

UTTERLY UNRIVALLED. UTTERLY UNBIVALLED. The above speaks for itself. From strict inquiry appears that the benefit from using Kenting's Cough Lozenges is understated. The operation was a specially severs one, and was performed by the specialist, Dr. H. T. Batlin, of et. Bartholomew's Hospital. Sines the operation the only means of refrom the nature of the case the throat frritation intense. WEIGHT IN GOLD.
